

The Colorado Mountain Club

Deposited on summit of THUNDER MOUNTAIN

Date AUGUST 2 - 1970 By SPENCER SWANGER

The altitude of this summit is 13,932 feet.

THOSE VISITING THIS POINT ARE INVITED TO REGISTER THEIR NAMES, ADDRESSES AND DATE OF ASCENT

It is particularly requested that both sides of the paper be used and nothing be written in this Register except the date and the names and addresses of those making the ascent. If there are features of your trip that are of general interest, The Colorado Mountain Club will be very glad to receive an account of the same by letter.

The Colorado Mountain Club has placed this Register at this point in order that you may record your ascent and in order that the Club may collect data regarding the number of people that make this climb and the localities from which they come. **DO NOT MOLEST OR DESTROY.**

Penciled records are less apt to become illegible than ink. In case the pencil attached to this register has become lost, will you kindly put one in its place.

Please show your appreciation of the purposes and efforts of The Colorado Mountain Club by using care in replacing this Register in the metal or plastic tube, carefully securing the cover (not too tightly), and restoring the tube to the spot from which taken. Your assistance in preventing damage to or removal of this Register by any thoughtless or malicious person, will aid the Club in its efforts.

Any communication regarding this tube or its contents, particularly if the Register is completely filled, will be appreciated by

THE COLORADO MOUNTAIN CLUB
